## 1. Introduction

This Notice to Mariners is to inform that the Caledonia Offshore Wind Farm will be collecting meteorological and oceanographic climate data from the Caledonia OWF site. The two buoys were deployed on the 3rd of June 2023 (see table 2.1 for as-built coordinates). COWF-SWLB080 was repositioned to a new location within the site (coordinates below) on the 3rd of June 2024. Marine users are advised to maintain a safe clearance distance of 500m from the buoys.

#### COWF-SWLB080 Broken Mooring 26/08/2024

Primary Buoy, COWF-SWLB080, has broken free from its moorings and has drifted from its position in a Northeast direction. Buoy AIS is active and its position is known. Vessel Mar Fortune (IMO 9267273) is currently monitoring/guarding the buoy whilst awaiting calmer conditions to recover the buoy. COWF-SWLB080 mooring system remains in position (see 2.1) and marine users should continue to maintain a safe clearance distance from this location.
